

Workshop Informations

Elevate Your Team's Angular Expertise

Boost your team's efficiency and code quality with our hands-on Angular workshop. What you'll get:

- Unified, modern standards for the entire team.
- Cleaner code that's easier to develop and maintain.
- Faster development cycles and feature deployment.
- A more scalable application architecture.

Your Instructor Mateusz Stefańczyk (GDE)

For 8 years, Mateusz has been developing web applications with Angular. He has performed dozens of audits for Angular projects worldwide. Mateusz actively participates in the [angular.love](https://angular.dev) community, writing expert articles, and sharing his knowledge at (20+) Angular events in Poland, Norway, Germany, and the UK.

A Typical Workshop Day

While this is our proven, hands-on structure, the topics are **always tailored to meet your specific needs**. We'll adapt this template to solve your team's most pressing challenges.

***Workshops can be organized online or offline.**

Example (8h)

- 9:00 – 10:30 | BLOCK 1
- 10:30 – 10:50 | Short Break
- 10:50 – 12:20 | BLOCK 2
- 12:20 – 13:20 | Lunch Break
- 13:20 – 14:50 | BLOCK 3
- 14:50 – 15:10 | Short Break
- 15:10 – 17:00 | BLOCK 4

Available Workshop Topics

We offer a range of workshops available for public sign-up or as a dedicated session for your team. For dedicated workshops, the agenda can be fully customized to your team's needs.

- **Modern Angular**
- **Signal Forms**
- **Architecture**
- **Performance Master**

What Your Team Gets

- ✓ **100% Hands-On Exercises:** You Learn by doing. Our workshops focus on live coding and practical tasks, not just theory.
- ✓ **Full Access to Source Code:** You will get access to the complete source code and all exercises to experiment with after the workshop.
- ✓ **Certificate of Completion:** Receive an official confirmation of your new skills to share with your team and add to your professional profile.
- ✓ **Dedicated Q&A Session:** Get straightforward answers to your specific questions during the Q&A session in the workshop to solve your real-world problems.

Ready to bring a workshop to your team?

Let's discuss your needs and create a customized training plan to elevate your team's skills.
